- **Subscription Leak Detector:** Python tool that uncovered £839 in annual recurring charges.

INTERESTS

AI, Technology, Financial Markets,
Charity, Travelling and Reading

PROFILE

First Class Applied Computing graduate with a robust background in technical product support, structured testing and root cause investigation of live products. Skilled in functional, regression and defect fix testing, translating technical and customer requirements into clear documentation and test scenarios across regulated, data driven environments. A proven track record of managing secure user access through, driving process improvements and communicating confidently with stakeholders across technical and non-technical teams.

EXPERIENCE

Product & Operations / Platform Tester

AUG 2026 – SEP 2026

Ticketshack - Intern

- Spearheaded functional, regression and defect fix testing of the full organiser and buyer journey across iOS, Chrome and Safari, uncovering bugs, UI inconsistencies and edge cases.
- Documented every issue with reproducible steps, severity ratings and visual evidence, delivering daily findings reports that shaped the founder's prioritisation.
- Validated payment and checkout flows, verifying fee calculations and payout integrity before issues reached end users.
- Tested new features on staging before release and scoped a referral scheme with the founder, from business rules through to technical mapping.
- Benchmarked the platform against other platforms, highlighting feature and UX gaps.

AI Data Quality Analyst (Freelance)

JAN 2026 – JUL 2026

Scale AI

- Assessed AI generated outputs across 40+ tasks weekly against detailed accuracy, quality and alignment standards.
- Delivered structured feedback that shaped model training by flagging recurring error patterns for the client team.

Administrator / IT Support

MAR 2025 – JAN 2026

Key Transitions Ltd

- Promoted within 3 months for strong technical performance.
- Pioneered three interactive training tools for staff and young people, including a home skills game in 13 languages, all signed off by management before rollout.
- Decreased manual reporting time by 50% by building automated Excel and Google Sheets dashboards adopted across the team.
- Delivered first line support for 10+ daily enquiries covering system access, SSO and MFA enrolment, keeping records GDPR compliant.
- Validated system functionality through UAT, identifying bugs before release.

IT Service Desk Analyst

JUL 2020 – OCT 2020

GFM Holdings Ltd

- Achieved 90 to 100% first contact resolution through effective triage and troubleshooting.
- Managed Active Directory accounts for 50+ users, including SSO and two step verification setup.
- Onboarded new starters from account creation to device configuration, documenting fixes for the wider team.
