First Class BSc Applied Computing

PROFILE

Product-minded First Class Applied Computing graduate who has scoped and shipped a referral scheme, triaged and verified fixes alongside engineers and grown an online store of digital editable templates to more than 200 sales in five months. Adept at prototyping in Figma, testing with users and communicating confidently with technical and non-technical people, backed by a robust background in IT operations and AI data quality.

CORE SKILLS

- **Product:** discovery and user research, AI-assisted prototyping, user testing, journey mapping, requirements and business rules, prioritisation (weighted decision matrices), competitor analysis, usability evaluation, UAT and release testing
- **Professional Strengths:** stakeholder communication across technical and non-technical audiences, initiative, problem solving, adaptability, user empathy, prioritising competing tasks, clear written reporting
- **Tools:** Figma, Jira, Notion, Python (pandas, Flask, Streamlit), SQL (MySQL), Excel and Google Sheets dashboards, Postman, Bubble.io, AI tools (Claude, ChatGPT, Copilot), Active Directory, Exchange, Microsoft 365

PROFESSIONAL EXPERIENCE

Product and Operations / Platform Tester (Intern) | TicketShack **Aug 2026 to Sep 2026**

- Triaged 21 bugs by severity and user impact within the first day, giving engineers a clear priority order; drove an iterative QA and regression testing cycle until every bug and later issue was verified and closed.
- Defined the business rules for a new organiser referral scheme with the founder (credit thresholds, expiry, email triggers), balancing growth with margin, and translated them into developer requirements; shipped before the internship ended.
- Tested checkout and ticket purchase flows end to end, including cancellations and refunds, and recommended fee calculator placement so organisers see their costs upfront.
- Mapped the journey for logged-in event goers who had not yet purchased and prototyped an improved experience in Figma to encourage a first purchase, reporting progress to the founder in plain English daily logs.

AI Data Quality Analyst (Freelance) | Scale AI **Jan 2026 to Jul 2026**

- Evaluated 40+ AI-generated outputs weekly against detailed accuracy and alignment standards across varied subject areas.
- Delivered structured feedback that informed model training, flagging recurring error patterns for client teams.

Administrator / IT Support | Key Transitions Ltd **Mar 2025 to Jan 2026**

- Earned a promotion within three months; decreased manual reporting time by 50% by building automated Excel and Google Sheets dashboards.
- Provided IT support and administration for a company supporting young adults who were NEET and asylum seekers, adapting priorities daily.
- Designed interactive HTML training games, including a multilingual home skills game for young people and case recording and risk assessment training for staff, replacing 100+ pages of reading.
- Maintained 54+ GDPR-compliant records at 100% accuracy, administered SSO and MFA enrolment and generated income by pitching operational support to charities.

IT Service Desk Analyst | FGM Centre and GFM Holdings Ltd **Jul 2018 to Oct 2020**

- Resolved 20 to 40 tickets weekly at 90 to 100% first-contact resolution, explaining fixes clearly to non-technical users.
- Administered Active Directory accounts (onboarding, offboarding, password resets, group permissions), Exchange mailboxes and SSO and MFA enrolment.

ENTREPRENEURIAL EXPERIENCE

Founder | ADol Designs (online store of digital editable templates) **2026 to Present**

- Generated more than 200 sales in the first five months by marketing consistently and analysing store data and metrics to see which designs customers wanted more of.
- Studied competitor stores, refreshed templates in response to demand and expanded beyond a single event type, keeping the range creative and relevant.
- Designed the buyer journey around user empathy, so customers download and personalise their template quickly and easily.

PROJECTS

- **Medicine Verification System (Dissertation):** Delivered a progressive web app for medicine verification with role-based access, QR scanning and a regulator dashboard; validated with real users, achieving 100% task completion and 80% positive usability ratings.
- **PantryPal Decision Matrix:** Prototyped a live Streamlit app, ranking five candidate features against five weighted criteria to showcase data-led prioritisation.
- **Plum UX Evaluation:** Evaluated a mobile banking app against HCI principles, recommending design improvements.

EDUCATION AND DEVELOPMENT

BSc (Hons) Applied Computing, First Class, De Montfort University (2022 to 2025); **CertHE Business Management**, University of Essex (2020 to 2022)

Product Management programme, Code First Girls (in progress). Self-directed: AI PM (Duke) and PM courses (IBM, SkillUp).
